

Why Support Planned Parenthood?

The total number of U.S. abortions was highest in 1990 and has declined almost every year since. Planned Parenthood, however, has increased its percentage of abortions ever since. In 2021, the latest year that the numbers are available, Planned Parenthood committed 374,155 abortions – over 40% of all abortions in the United States.

But doesn't Planned Parenthood provide essential health care? Let's look at some of its numbers over the last decade:

- In 2011, Planned Parenthood provided 639,384 breast exams. In 2021, it provided 193,045 – a decline of 70%.
- In 2011, Planned Parenthood provided 585,978 Pap tests. In 2021, it provided 228,466 – a decline of 61%.
- In 2011, Planned Parenthood provided 49,058 HPV treatments. In 2021, it provided 16,556 – a decline of 66%.
- In 2011, Planned Parenthood provided 39,763 colposcopy procedures. In 2021, it provided 14,878 – a decline of 63%.
- Planned Parenthood performs zero mammograms

The number of real medical services provided by Planned Parenthood is plummeting while the number of abortions it performs increases, but Planned Parenthood's taxpayer funding also increased from \$542 million in 2011 to \$670 million in 2021.

Planned Parenthood is the nation's largest abortion chain and has been caught shielding child predators, lying about what services it provides, deceiving government officials, defying state and federal laws, submitting fraudulent Medicaid claims, and harvesting and selling aborted baby parts.

Because of its huge abortion business, unethical activity, and partisan political involvement, Planned Parenthood is one of the most divisive organizations in the country.

Why support it?

All numbers are taken from Planned Parenthood's annual reports and 990 tax filings.
