

Why Support Planned Parenthood?

The total number of U.S. abortions was highest in 1990 and has declined almost every year since. Planned Parenthood, however, has increased its percentage of abortions ever since. In 2024, the latest year that the numbers are available, **Planned Parenthood Federation of America committed 434,450 abortions – over 40% of all abortions in the United States.**

But doesn't Planned Parenthood provide essential health care?

Planned Parenthood's own reports over the decades show a clear trend:

The number of medical services provided by Planned Parenthood is plummeting while the number of abortions it performs increases, along with its taxpayer funding. Planned Parenthood received \$832 million in 2024, up from \$554 million in 2014 and up from \$305 million in 2004.

Planned Parenthood's reported total number of patients has dropped 16% since 2014 and 28% since 2004.

Planned Parenthood is the nation's largest abortion chain and has been caught shielding child predators, lying about what services it provides, deceiving government officials, defying state and federal laws, submitting fraudulent Medicaid claims, and harvesting and selling aborted baby parts.

Because of its huge abortion business, unethical activity, and partisan political involvement, Planned Parenthood is one of the most divisive organizations in the country.

Why support it?

All numbers were published in Planned Parenthood's own annual reports.
